SUITABLE ADAPTORS FOR HD VERSION AS WELL AS STANDARD VERSION WITH EXTRA NUT (INCLUDED):

NO BOLT OR NUT INSIDE TO DISTURB THE RUBBER MOVEMENT THE HEAVY DUTY VERSIONS REQUIRE NO EXTRA NUT

ROTARY GOUGES & SHARPENERS

Art. No. 810626

Art. No. 810625

The B&J Rotary Sharpener is designed to sharpen small and large Rotary Gouges quickly, cleanly and safely. It conveniently mounts to the top or side of a work bench. Simply press a spinning gouge (on either air tool or flex shaft) between the two angled sharpening stones. Additionally, the sharpening stones can be used for the air tool for grinding off exposed wire.

Included with the Sharpener are rubber rings to be fitted inside the Rotary Gouge before sharpening. The rubber ring will eliminate the ringing sound (vibration) normally experienced when sharpening Rotary Gouges.

The use of these rubber rings will also result in a sharper edge and less sharpening wheel wear.

ROTARY SHARPENER

- Complete Set for sharpening of RG Ø 2" & 1 1/4" (with rubber inserts 2" & 1 1/4") _____ Art. No: 810625
- Complete Set for sharpening of RG Ø 1 1/4" & 3/4" (with rubber inserts 1 1/4") _____ Art. No: 810626
- Replacement Stones for Sharpener No. 810625, 6 pcs. per box _____ Art. No: 810635
- Replacement Stones for Sharpener No. 810626, 2 pcs. per box _____ Art. No: 810636
- Reducer Washer 1/2" to 3/8" _____ Art. No: 817200
